

# Year-End Timeframes

End-Point Assessment  
**2025**

# Introduction

The table in this document shows our recommended gateway submission dates across each standard. We ask that you work towards these dates to ensure that end-point assessment is completed by **31 July 2025**.

Our recommended gateway submission dates are measured from our average completion timeframe per standard and any prescribed windows that must be adhered to, as per the individual assessment plans.

**Assessment window** refers to the individual prescribed timeframes in which all assessment methods are undertaken as outlined within the [published assessment plan](#).

**Our average completion timeframe**, per standard, refers to the average duration of an apprentice being accepted through gateway to completing the final EPA component.

*\*The assessment may be affected by nursery school, school or college closures or different activities during the last few weeks of term/July. The gateway date represents this aspect. Please ensure this is accounted for when planning for year-end completions.*

## Worked example of our recommended gateway submission dates

Our typical timeframe from gateway approval to end-point assessment completion (*completion of the last EPA component*) for the Level 3 Early Years Educator v1.2 standard is two weeks, provided the MCQ examination is scheduled and achieved within five days of successfully passing through gateway. Therefore, we recommend that for this average duration to be achieved, training providers should aim to have their apprentices accepted through gateway by no later than 17 July 2025.

## Considerations

The timeframe for end-point assessment completions is based on current registrations and predicted gateway information provided. Bulk registrations nearer to the gateway dates provided could affect the feasibility of end-point assessments being conducted within our average end-point assessment window.

For TQUK to manage this process effectively, we request that pipeline data is reviewed for accuracy as soon as possible. Whilst we will endeavour to support all requests, we may not be able to guarantee July completion for submissions after the specified gateway date.
